COMPETITIVE INTELLIGENCE BRIEFING

Scopely — Studio & Portfolio Snapshot

Grounded against strategy namespace: **northstar-strategy**

1. Who They Are

Scopely, headquartered in Culver City, California, is a prominent player in the mobile gaming sector, operating as a business-to-consumer (B2C) company under the ownership of Savvy Games Group. Founded just before the surge in mobile and live-service gaming, Scopely has evolved immensely, establishing itself as the second-largest mobile game publisher in the world. Their focus spans various interactive entertainment formats including mobile, web, PC, and console games.

The studio prominently features games based on recognized intellectual properties (IPs) such as MONOPOLY, Pokémon Go, and Star Trek. Scopely's approach centers around creating memorable experiences, enabling players to engage deeply with their products, which has culminated in a remarkable $10 billion in lifetime revenue by 2024 and over one billion downloads across their titles. The company's success revolves around its ability to iterate on existing titles and leverage collaborations with dynamic IPs.

Recognized for their achievement in the gaming industry, Scopely was named the number one game maker by PocketGamer.biz in 2024 and received awards for Best Publisher and Game of the Year for MONOPOLY Go! at the Pocket Gamer Mobile Games Awards. The studio's trajectory illustrates a commitment to quality and community, ensuring sustained player engagement and loyalty.

2. How They're Doing (Portfolio & KPI Snapshot)

2. How They're Doing (Portfolio & KPI Snapshot)

Studio-Level Revenue & Downloads (Reported Estimates):

- Scopely has surpassed $10 billion in lifetime revenue and has achieved over one billion downloads across its portfolio (Source: Variety).
- The flagship title MONOPOLY GO! has generated over $5 billion in revenue within two years post-launch (Source: Yahoo Finance).
- The company's games have accumulated over 15 billion hours of playtime, cementing its place as a leader in the mobile gaming industry (Source: Scopely).

iOS Storefront Telemetry Table:

Game Title	Genre	Rating (Stars)	Total Ratings	Rating Velocity (/yr)	Last Update	LiveOp Signal
MONOPOLY GO!	Board Game	4.6	212,354	12,476	2025-09-01	Active LiveOp (<=21d
STAR TREK FLEET	Strategy	4.5	54,901	8,750	2025-08-15	Active LiveOp (<=21d
MARVEL STRIKE	Action RPG	4.7	350,000	10,200	2025-10-05	Active LiveOp (<=21d

3. What's New

- Scopely is hosting the **'Monster Hunter Now Carnival 2026'** event globally from November 28-29, allowing players to engage with challenging monsters (Source: InvenGlobal).
- A **Halloween event** for *Monster Hunter Now* is announced from October 26 to November 8, offering unique rewards and activities for players (Source: InvenGlobal).
- *Pikmin Bloom* has introduced a Halloween season event showcasing new themed decorations and items from October 1-31 (Source: InvenGlobal).

4. What It Means For Our Studio

Observation -> Implication for Our Studio -> Low-Risk Test -> Success Metric

1. **Scopely's focus on IP-rich games (like Pokémon Go and MONOPOLY Go!)** has resulted in significant revenue growth and player engagement. **-> Our studio can explore partnerships with well-known franchises to enhance retention and monetization. -> Test a limited-time offer integrating a third-party IP into our game. -> Measure the increase in daily active users (DAU) and in-app purchases (IAP) within the testing period.**
2. **Scopely’s strong LiveOps strategy, consistently engaging players through events, is a clear driver of player retention. -> Our studio may benefit from implementing a structured LiveOps calendar to enhance player engagement. -> Initiate bi-weekly mini-events and seasonal promotions in our games. -> Track player retention rates and monetization metrics before and after implementing these events.**
3. **With Scopely achieving high ratings and continual updates, it's evident that frequent game enhancements contribute to player satisfaction. -> Essential for our studio to focus on iterative updates and consider player feedback for continuous improvement. -> Establish a feedback loop with players through surveys and forums. -> Analyze player sentiment improvements through feedback ratings and app store reviews.**
